

High Definition Sound  
Noise Reduction  
Stereo Music

# B609

## MUSIC NECKLACE

Foldable + Retractable Bluetooth

### USER MANUAL

For user safety, please read this manual in its entirety before using the B609 headset.

The following matters should be paid close attention to when using the headphones:

Please avoid using the high volume mode because it may lead to hearing loss due to excessive noise.

If you are in a potentially dangerous situation, please stop using the headphones to ensure your safety.

Users should exhibit reasonableness in controlling the volume and in listening time when using the headphones.

The volume should not be so high that it prevents you from hearing voices around you. If the volume is set too high, a condition known as tinnitus (ringing in the ears) may set in. If you experience any such sensations, please lower the volume to prevent permanent hearing loss.

We do not recommend listening to music while driving.

To clean the B609 headset, use a dry soft cloth only. The use of water should be avoided. Submersion of the headphones into liquid will damage the headset.

If you experience any obvious discomfort, unwanted sensations or other adverse reactions while using the headset, stop using them immediately.

The headphones should not be stored or used in temperatures below 15° C (5° F) or higher than 55° C (131° F). Operating outside of this temperature range will reduce the life of the headphones and/or the battery.

## Charging and Battery:

Before charging this headset, please check that the charging cable you're using is the original one.

### Warning:

Please charge this headset with the original charging cable only. Use of improper charging cables may damage the headset or battery.

This headset features built-in rechargeable batteries, so to avoid damage do not attempt to remove the battery from the headset.

1. Before charging, it's best to turn off the headset.
2. To begin charging, insert the USB charging cable into the earpiece jack and the other end of the USB port into the USB charger or any other power device.

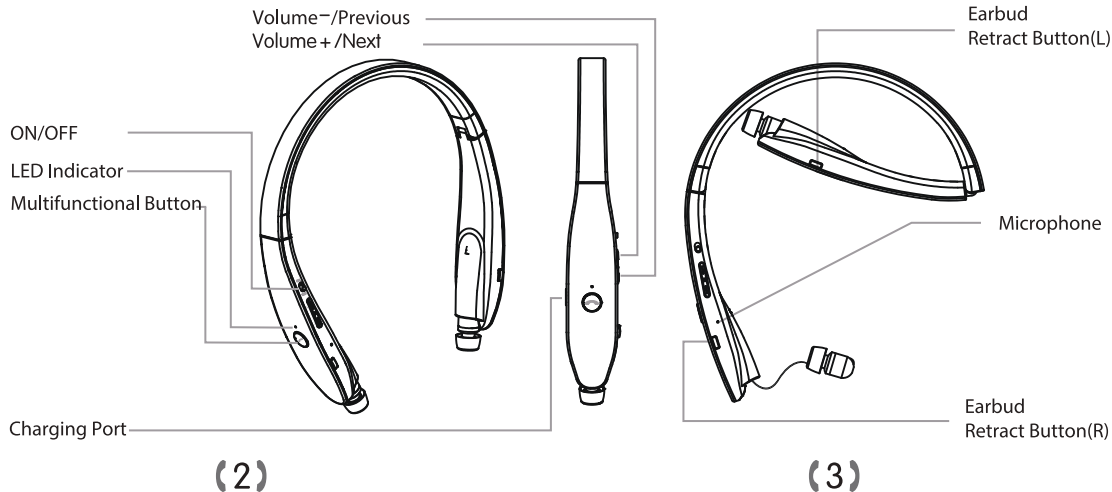

3. The headset needs about 2 hours of plug-in time for full charging. The red light will go off when the B900+ is fully charged.

### ■ Package content:

- Headset 1pc
- USB charging cable 1pc
- Earbud 3pcs
- User Manual 1pc

### ON/OFF

1. Push "ON." The headset will vibrate and prompt "Power ON." If the red and blue lights alternately flash, the headset is ready for pairing with your device.
2. Switch to "OFF" to turn off the headset. The prompt "Power OFF" will display.

### Bluetooth connection steps:

1. Please keep your headset and mobile phone as close as you can, within 1 meter of each other.
2. Switch the headset to "ON." After 5 seconds, the headset will prompt "Pairing." The red and blue lights will then alternately flash when the headset is on and ready for pairing.
3. Turn on "Bluetooth" in your device's settings and find the headset's Bluetooth name: B609.
4. Click B609. The Bluetooth headset will connect with your mobile phone automatically. Some phones may require a pass code, which is 0000.

### Pair the headset with 2 mobile phones

1. After successfully pairing with a mobile phone, close the phone's Bluetooth function and switch the B609 button to OFF.
2. Follow the same procedure to get the second mobile phone paired with the Bluetooth headset.
3. Turn on the Bluetooth function on the first mobile phone and choose B609 to complete the pairing status with the second phone.

### Note :

1. With you perviously paired device's Bluetooth turned on and in range , turn on the B609. The headset will automatically reconnect to the same Bluetooth device that connected last time. If you have a previously paired device that does not auto-reconnect , navigate to the Bluetooth settings menu on your device , turn on the Bluetooth feature , and select "B609" from your list of paired Bluetooth devices .

Product pictured in this manual is for demonstration purposes only. The actual product may be different.

2. If pairing time exceeds 3 minutes, the B609 headset will automatically shut down. If still within the effective distance, the headset can automatically return to the last connected device.

3. NOTE: If connected to two mobile phones, only the first mobile phone supports wireless music but you can start a conversation with both phones. Battery check-up can be performed with an iPhone.

### Answer & End Call / Incoming Call Vibration Reminder

#### Answer Phone Call:

When there is an incoming call, you will hear the voice prompt "Incoming call" followed by the phone number of the caller. Click MFB to answer or just operate your mobile phone as you normally would.

#### End Call :

Press the multifunction button to hang up calls or by directly hanging up your phone call.

#### Reject Call :

When there is an incoming call, you will hear the voice prompt "Incoming call" and the headset will vibrate. Double click MFB to reject the call or just reject it on your mobile phone as you normally would.

#### Last Number Redial :

Double click MFB.

#### Call Transfer :

Double click the volume "■" when calling to transfer between the phone and headset.

#### EQ Shift:

Double click the volume "■" when playing music to achieve different sound effects (low bass boost, normal, high pitch boost). The default setting is low bass boost. Choose your favorite sound effect based on your listening habits and preferred music style.

#### Power Prompt :

Each time you turn on the B609 headset, it will report the amount of battery power remaining with prompts like "battery full," "battery level high," "battery level medium," "battery level low" and "recharge headset."

#### Voice Dial :

Unlock the mobile phone and double click the volume "■" to launch the voice dial. Then simply speak the name of the person you want to call. This functionality works only if your mobile phone supports it.

## Play/Pause/Tracks

During music playing, single click MFB to pause music, and click MFB again to return to playing.

During music playing, single click “+/-” to change songs.

During a call or while listening to music, the user can long press the + - button to adjust the volume.

## Mobile Phone Anti-loss Indicator

When the headset is connected to your smartphone, if the distance between the two is beyond 20 meters, the headset will prompt "Beyond the range of connections." If returning to a working distance within 3 to 10 minutes, the prompt will be off but the headset will reconnect automatically. If not returning to a working distance within 10 minutes, the headset will power off. Please switch the button to OFF and then switch it ON again to re-power the headset and allow it to work once more.

## Restore Factory Settings

Long press MFB while charging until the blue light flashes 3 times.

## ■ Technical Index
